

WOULD YOU LIKE TO PARTICIPATE IN THE #AIGUABCN PROJECT AND FIND OUT THE QUALITY OF THE WATER IN YOUR HOUSE?

The first BCN map of tap water quality

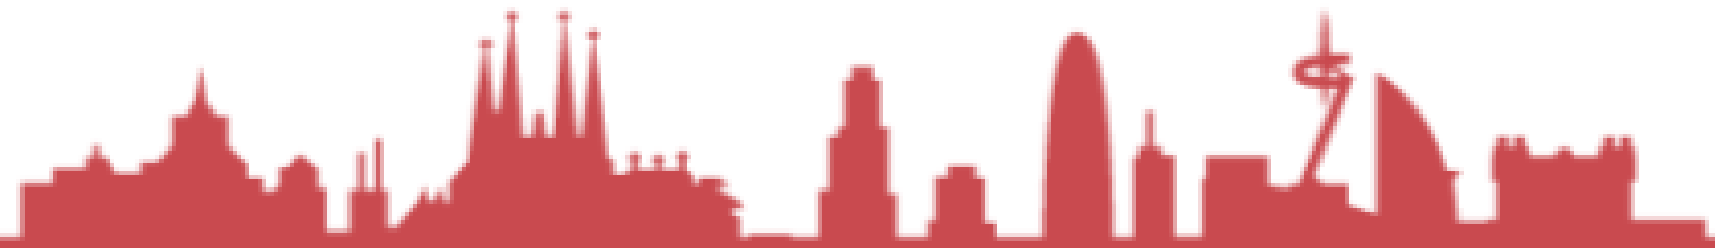

Prolonged exposure to low concentrations of water pollutants is associated with chronic diseases and aging

The European Drinking Water Directive sets the criteria for the quality of water intended for human consumption in Europe.

The compounds contained in the water could be harmful in combination with others.

The AiguaBCN project will construct a map with the concentrations of emerging contaminants present in Barcelona's drinking water and will serve to study the effects on health.

A project of:

UNIVERSITAT
ROVIRA I VIRGILI

Financed by:

"la Caixa" Foundation

Ajuntament de
Barcelona

We are looking for volunteers Barcelona residents

1. We will ask you to answer a short questionnaire to assess whether you are **eligible** for the study (for example, to find out what water you usually drink).
2. We will stay one day to go to your home to collect a sample of tap water, a urine sample to measure emerging contaminants, and answer a questionnaire.

The confidentiality of your data will be guaranteed at all times.
