BACKGROUND

Deciding to work towards a PhD is an important academic step to take, one which requires the pre-doctoral researcher to tackle a broad range of issues. Some involve enhancing the researchers’ capacity for critical thought, while others refer to the specific knowledge and techniques relevant to the researcher’s chosen field. On a completely different level, a pre-doctoral researcher will also have to face a wide range of practical questions, which often vary from one institution to another. The Barcelona Institute for Global health (ISGlobal), as a University Research Institute associated both to the University of Barcelona and the University Pompeu Fabra, and also as member of the CERCA research centres of Catalonia and Severo Ochoa Centre of Excellence (named by the Spanish State Research Agency in October 2019), is extremely active at postgraduate program level. The training and supervision of PhD researchers is one of ISGlobal’s core tasks.

If you enrol in ISGlobal’s PhD Program, you will need to familiarise yourself with the pertinent terms of reference and procedures of our institution.

We trust that this guidebook will prove of use to ISGlobal pre-doctoral researchers and their directors/supervisors during the doctoral period at ISGlobal.

PURPOSE

The purpose of this guidebook is to provide the new ISGlobal pre-doctoral researchers and their directors/supervisors with an overview of the organisational specifics of their pre-doctoral training at ISGlobal and inform them of their position, rights and obligations. Additionally, it provides information on the administrative procedures with the universities.

The guidebook refers to PhD researchers at ISGlobal registered at a PhD program usually in the UB or the UPF, with an ISGlobal researcher as thesis director/supervisor. This also includes PhDs in co-tutela, as well as PhD researchers with grants or contracts in other institutions with an adscription agreement with ISGlobal (mainly Training Fellows from CISM, Joint Nanomalaria Unit IBEC-ISGlobal, and ISGlobal-IGTP group of Hernando del Portillo).
ISGlobal PhD PROGRAM

To enter the ISGlobal PhD program and be considered an ISGlobal pre-doctoral researcher the researcher must have a pre-doctoral contract, an ISGlobal PhD thesis director/supervisor, and register in a University PhD program as soon as possible.

All ISGlobal pre-doctoral researchers should have their salary funded (by competitive grants or PI funds) for at least 3 years. If the PhD director/supervisor does not have funding for a minimum of 3 years, the researcher’s entry into the program will need to be approved by the Core Scientific Committee and will be conditional on the potential for obtaining sustainable funding.

If after the 3 years period an extension is needed, there must be a formal requirement of the supervisor to extend the contract securing the availability of funding. It is the responsibility of the PhD Director/supervisor to provide the additional funding needed. If there is no agreement on the justification of the extension between the PhD and the supervisor, the PhD committee should review the case and recommend a possible solution. Note that according to ISGlobal Human Resources regulations, only PhD researchers with a labour contract or secondment agreement can enter ISGlobal facilities.

All administrative issues related to admission into a PhD program at the university, annual registration, presentation and approval of the research project, annual follow-up, and submission and defence of the doctoral thesis will be the responsibility of the pre-doctoral researcher. The same applies to fellowship application.

The ISGlobal PhD program is coordinated by the ISGlobal PhD Committee, whose members include ISGlobal’s Education and Training Director, one program coordinator from each Campus, the Scientific Coordinator, and two PhD representatives from each Campus (see Annex 1 for the list of contact people).

The role of ISGlobal’s PhD Committee is to ensure that each PhD researcher gets proper guidance from their supervisors and to assess and evaluate the general progress of the researcher’s doctoral thesis and, in general terms, the way they are performing their work at ISGlobal.

Pre-doctoral researchers will meet with an ISGlobal PhD Committee member yearly, to review their annual plan and progress, which they will have previously discussed, agreed and scheduled with their thesis supervisor. Annex 2, attached to the present guidebook, should be filled in and brought in for discussion at the annual meeting. This activity is compulsory.
PRE-DOCTORAL REQUIREMENTS

Every university has its own regulations based in the legal framework that regulates the doctoral studies and programs in Spain and its own organisation of PhD studies, usually through Doctoral Schools. In the case of the University of Barcelona, these regulations are gathered in the document “Normativa reguladora del doctorat a la Universitat de Barcelona” and for Universitat Pompeu Fabra in “Normativa dels estudis de doctorat de la UPF i normes específiques dels màsters amb vinculació a un programa de doctorat”.

It is the responsibility of the pre-doctoral researchers to know the general doctoral regulations that apply in their university and the specific ones that apply to their PhD programme.

Most pre-doctoral researchers at ISGlobal register for the University of Barcelona PhD Program of Medicine and Translational Research or for the Biomedicine PhD program at University Pompeu Fabra. Doctoral researchers at ISGlobal might also follow other PhD programs at the University of Barcelona, University Pompeu Fabra or other universities, in those cases you should look for specific regulations.

The doctoral programs’ main purpose is to provide PhD researchers with advanced training in research methodology and techniques through organized training activities and research, prior to preparation and defence of a dissertation leading to the award of doctorate. Doctoral studies focus on research activities for the preparation and defence of the PhD dissertation (doctoral thesis), and training activities are usually developed earlier in the context of one or more research master’s degrees.

Payment of doctoral program fees at universities: 50% of a PhD researcher’s doctoral program fees will be covered by the thesis director/supervisor budget, unless already covered by a grant. Fees for enrolment in PhD programs may vary in different universities according to the rank of fees annually approved by the Generalitat de Catalunya.

To be admitted in a Spanish university PhD programme, students that possess a foreign degree issued in a non-European country, need to prove that the certificate has an equivalent training level to the corresponding Spanish master’s degrees and that it allows, in the country where it has been issued, to gain admittance to the doctoral studies. The application to be admitted in a PhD programme at Spanish universities require the presentation of the original bachelor and master degrees’ diplomas or certificates (or their official certified copies), as well as the academic qualifications certificate (transcripts) of the courses taken for each programme. You can check the procedures for legalization and translation in the website: http://www.ub.edu/acad/noracad/documents/en/legalitzacio_en.htm

If the diplomas or the academic transcripts are not written in Catalan, Spanish or English you will also have to include the respective notarized translations into Catalan or Spanish. Check the website of your

programme for specific requirements. This process can take up to 6 months depending on the country where diplomas and transcripts have been issued.
**PhD PROGRAM IN MEDICINE AND TRASLATIONAL RESEARCH (UB)**

Most ISGlobal PhD researchers at Campus Clinic are registered in this program. The **objective** of the Doctoral Program in “Medicine and Translational Research” is to train researchers in the different fields of clinical and biomedical research providing competitive, homogeneous, structured and high quality third cycle studies.

The Doctoral Program in “Medicine and Translational Research” provides multidisciplinary training for university graduates with different degrees and diplomas (Medicine, Biology, Biochemistry, Biotechnology, Pharmacy, Nursing or other health related studies), increasing their clinical knowledge and the epidemiological and biological bases of diseases as well as research on its best treatment and recovery strategies.

The **specific objectives** of the program are:

- To know the methods and techniques of clinical investigation related to evidence-based-medicine and epidemiology.
- To provide both theoretical and practical training on the different aspects of biomedicine and biotechnology, particularly on the physio-pathological mechanisms responsible for disease.
- The PhD researcher will obtain skills in the methodology of research, bioethics and the capacity to make a critical analysis and synthesis of the results achieved.
- The PhD researcher will be qualified for other activities requiring a high scientific level, particularly in education, management, development and innovation.
- To increase and promote translational research.

The purpose is that the knowledge and training acquired during this doctoral program will be useful not only for the development of experimental work related to the doctoral thesis but also interesting for institutions willing to incorporate scientific staff who is competent in clinical, biomedical and public health management.

As indicated in the following diagram to apply for access to the program you need to be accepted in a research group at ISGlobal and have the agreement of your supervisor.
Full information on the UB Doctoral Program in Medicine and Translational Research (scientific and administrative) is available at the following address: https://www.ub.edu/portal/web/medicina-ciencies-salut/doctorat-medicina-recerca-translacional

ISGlobal has a permanent representative in the Committee of the UB Doctoral Program in Medicine and Translational Research (at the moment Núria Casamitjana, nuria.casamitjana@isglobal.org). You can contact this representative for more information or clarification.
BIOMEDICINE DOCTORAL PROGRAM (UPF)

PhD researchers from Campus Mar usually sign up for the UPF Biomedicine PhD program.

The main aim of the doctorate in Biomedicine is to train researchers to produce a doctoral thesis in the field of health and life sciences. The program provides the researcher with all the tools necessary (analytical, experimental and theoretical) to achieve said end. The doctorate in Biomedicine is an international program attended by a large number of both international and domestic researchers.

Full information on the UPF Biomedicine PhD program (scientific and administrative) is available from the following address: [https://www.upf.edu/phd-biomedicine](https://www.upf.edu/phd-biomedicine).

ISGlobal has a focal person for the UPF Doctoral Program in Biomedicine (at the moment Judith Garcia Aymerich, judith.garcia@isglobal.org). You can contact her for more information or clarification.

DOCTORAL PERIOD AT ISGlobal: REQUIREMENTS

At ISGlobal we highly recommend pre-doctoral researchers to **complete their research project and submit their PhD thesis within a maximum of a 4-year period**. During the period they are developing their thesis, pre-doctoral researchers must fulfil the following requirements:

- **Annual Follow Up**: complete the required form (see Annex 2) and attend the corresponding annual meeting with a member of the ISGlobal PhD Committee.

- **Formal training**: there are some minimum training requirements on cross-cutting issues to be achieved by all PhD researchers at ISGlobal (see Annex 3). This training will be provided through the annual ISGlobal Continuous Training Program. If the researcher already has the required knowledge no additional training will be required. The cross-cutting training requirement will be assessed in the annual review. In addition, each pre-doctoral fellow will agree with his/her PhD thesis director/supervisor the required training related to the specific project in which he/she is involved.

- **PhD Symposium**: attend and actively participate in the yearly PhD Symposium. This symposium is a one-day retreat with the objective of raising visibility of the pre-doctoral work among the staff of the different ISGlobal scientific areas, create opportunities for networking and boost the synergistic interaction among the researchers through potential scientific collaborations.

- **Scientific communication and networking**: attend and actively participate in ISGlobal Events (ISGlobal Seminars, Team Building, Scientific Retreat and other meetings) as well as other conferences and workshops related to the individual’s field of research.

- **Management**: two PhD researchers from Campus Mar organize weekly Seminars at Campus Mar for two trimesters, with the support of a PI. In addition, four PhD researchers (2 from Campus Clinic & 2 from Campus Mar) co-organize the PhD Symposium yearly.
• **Representation:** Two PhD researchers from Campus Clinic and two from Campus Mar are elected yearly to represent the PhD researchers at the PhD Committee and in any other forums where PhD representatives are required.

• **Teaching:** pre-doctoral researchers may teach whenever possible and under the approval of their director/supervisor. Some specific scholarships/grants (FPU) request a certain number of teaching hours at the university. If you are requested or interested in doing so, please inform the ISGlobal Education & Training Department (nuria.casamitjana@isglobal.org).

### THESIS DIRECTOR/SUPERVISOR

All pre-doctoral researchers are supervised by ISGlobal researchers, whose main task is to support and guide their thesis research work and ensure the PhD researcher achieves the goals described above.

ISGlobal PhD thesis directors/supervisors will be Research Professors, Associate Research Professors, Assistant Research Professors or Associated researchers that will have to comply with the specific requirements of each university. Scientists in other categories may be eligible as co-directors with the previous agreement of the Core Scientific Committee if they comply with the university requirements. As specified in the ‘ISGlobal PhD Guidebook’ section above, the PhD candidate research, training and other activities will be reviewed, evaluated and planned on a yearly basis, together with their thesis director/supervisor, and reviewed during the annual meeting with the PhD committee (see General Scheme: Plans for PhD researchers [Annex 2]).

ISGlobal researchers are strongly committed to the supervision of their PhD researchers and will do all possible to ensure the PhD research projects proposed are achievable within the stipulated maximum 4-year pre-doctoral training period and the appropriate funding is available. However, any issues that may arise between the pre-doctoral researcher and his/her thesis director/supervisor that may place in doubt the feasibility of the planned research project, and thus the completion of the researcher’s PhD thesis, should be reported to the ISGlobal PhD Campus Program Coordinator (see Annex 1 for the information on contact people). In case of Conflict of Interest, a different member of the PhD Committee can be contacted.
Roles & Responsibilities of PhD ISGlobal Thesis Directors/Supervisors and Tutors

Director / Supervisor:

The director/supervisor is the person responsible for the scientific direction of the thesis, in accordance with the regulations at the universities and the specific doctoral programs. The director/supervisor must be accredited as thesis director/supervisor in the specific PhD program at the university.

The thesis director/supervisor is responsible for the coherence and suitability of the training activities and for the impact and novelty of the thesis in the corresponding scientific field, for the guidance in the planning, and for the adequacy, if any to other projects and activities in which the doctoral student is participating.

Tutor:

The tutor is responsible for ensuring the doctoral student's interaction with the Academic Committee of the specific doctoral program at the university.

The tutor is the person responsible for the adequacy of the training and research activity, in accordance with what is specified in the applicable regulations. The tutor must be linked to the doctoral program and belong as permanent academic staff to the corresponding university.

ISGlobal’s Code of Good Scientific Practice (the PRBB Code of Good Scientific Practice), specifies the responsibilities of supervisors and trainees. Regarding supervisors it states:

1) Responsibilities of supervisors:

   The supervisor defines the objectives and takes responsibility for the education of the individual in training, and should advise and guide the individual in order that the expectations of the initially proposed training may be fulfilled within the time allotted. Furthermore, the supervisor must provide the individual with the best possible conditions for the development of his or her future scientific career.

2) Obligations of supervisors:

   The specific obligations of supervisors are as follows:
   a) to interact personally with trainees for whom they are responsible on a regular basis in order to supervise the tasks with which the trainees are entrusted and ensure that those tasks are completed;
   b) to encourage regular meetings to discuss the progress of the assigned tasks and contribute to the scientific and technical development of the trainees;
   c) to monitor the working conditions of trainees and ensure that they receive appropriate health and safety training;
d) to provide trainees with up-to-date information regarding legal requirements affecting scientific activities.

In addition, ISGlobal PhD directors/supervisors should:

1) Jointly complete and validate the annual follow-up.
2) Pay a minimum of 50% annual registration fee if not covered by grants.
3) Commit to have funding to ensure the salary of the PhD researcher for at least 3 years and extend if needed until the PhD thesis defence.
4) Assess and facilitate training needs of pre-doctoral researchers.
5) Support attendance to conferences, aiming to have each PhD researcher present in at least one international conference.
6) Promote and facilitate mobility for researcher and training.

When a PhD pre-doctoral researcher formalises/signs his/her contract as ISGlobal staff with the ISGlobal Human Resources Department, the pre-doctoral researcher and his/her PhD director/supervisor will provide a completed and signed copy of the commitments agreed between the director/s and the PhD researcher (see template Annex 6) in order to be fully admitted in the ISGlobal PhD program. A copy of this signed document will be sent by e-mail to PhD@isglobal.org

**REQUIREMENTS FOR DOCTORAL THESIS PRESENTATION AND DEFENCE**

The amount and level of publications are dependent of each scientific field. Pre-doctoral researchers must comply with the requirements and rules set by the University where he/she is registered (see the requirements for UB7 and UPF8).

Overall, ISGlobal PhD program recommends including at least 3 publications (1 published, 1 accepted and 1 submitted) in the thesis.

ISGlobal needs to keep record of all doctoral theses defended. To ensure this, all PhD researchers must inform the Education & Training Department (PhD@isglobal.org) and the Human Resources Department (samuel.espinal@isglobal.org) the date of the submission and defence of their thesis at least one week in advance to the date of the presentation.

Researchers must send an email to PhD@isglobal.org including the following information:

- PhD Program and University
- Director/s
- Date & Time of defence
- International mention: yes / no
- Thesis Title
- Date of submission
- Place/Link to join
- Members of the tribunal

The defence will be announced in the Intranet as well as by sending an email to everyone at ISGlobal.

---

7 https://www.ub.edu/portal/web/medicina-cien-cies-salut/presentacio-de-la-tesi
8 https://seuelectronica.upf.edu/normativa-dels-estudis-de-doctorat-de-la-upf-i-normes-específiques-dels-masters-amb-vinculacio-a-un-programa-de-doctorat
**THESIS ALLOWANCE**

ISGlobal provides a thesis allowance to PhD researchers who develop their research at ISGlobal to assist with the direct costs associated with the production of the thesis book. The maximum thesis allowance that a researcher can receive is 400€ (VAT excluded). This allowance cannot be claimed if the PhD researcher has received any other kind of economic support related with the thesis presentation.

**Application Procedure:**

1) Complete the form ([Annex 5](#)) and attach the budget from the printing shop or the invoice if you have already paid.

2) If you **haven’t paid the invoice** you must do the following:
   1. Send the budget to Yolanda Amat ([PhD@isglobal.org](mailto:PhD@isglobal.org)) for approval by General Manager and Training & Education Director before printing the thesis.
   2. Once the allowance is approved, you must submit the purchase through the ISGlobal's [purchase website](#). Please note that to complete the purchase you need to upload the budget and authorization emails that Yolanda Amat has forwarded you, all in one document. The project code to allocate thesis allowances is: GE+year+08, and its associated cost center is ACRE98. For any doubt with this process, please contact the Purchase Department ([proveedores@isglobal.org](mailto:proveedores@isglobal.org)).

3) If the **invoice has been paid** you must do the following:
   1. Send the invoice to Yolanda Amat ([PhD@isglobal.org](mailto:PhD@isglobal.org)) for approval by General Director and Training & Education Director.
   2. Once the allowance is approved, you must claim the reimbursement through the ISGlobal Intranet:
      a. To complete the reimbursement, you will need to upload the invoice and authorization emails that Yolanda Amat has forwarded you, all in one document.
      b. The project code to allocate thesis allowances is: “**GE + year + 08**”, and its associated cost center is ACRE98. If you have problems with the Intranet please contact the IT Team: [sri.tic@isglobal.org](mailto:sri.tic@isglobal.org)

**IMPORTANT:**

The invoice or budget must be issued to ISGlobal’s name with the following information:

Address: Carrer Rosselló, 132
Barcelona, 08036
CIF: G65341695

**PhD FELLOWSHIPS**

During your doctoral period at ISGlobal, you need to be funded through a grant, a fellowship or through project funds from your thesis supervisor. All ISGlobal pre-doctoral researchers will have a salary in accordance to ISGlobal's salary scale. All ISGlobal PI's can propose candidates for competitive calls. If the candidate is selected and awarded but the fellowship is below ISGlobal's salary scale, the salary will be
top-up by the PI. When the PI does not have available funds to cover the top-up, a solution will be agreed with the general manager always assuring that the pre-doctoral researcher is within ISGlobal's salary scale. Pre-doctoral researchers are encouraged to apply for national/international doctoral grants/fellowships. Eligibility for the different grants/fellowships will vary and each case needs to be examined individually. The grants/fellowships offered by public organisations in Spain are summarized in the intranet. Any grant application should be managed together with the pre-award managers (see Annex 1 for contact details).

If a selection/prioritization of candidates is specified by the call requirements, the criteria used to prioritize will be based on the “Prioritization criteria for fellowships” Policy.

Some ISGlobal research groups are affiliated to research networks (i.e. CIBERESP) that offer grants/fellowships for stays or courses. It is highly recommended that PhD researchers check with their supervisor if they are eligible to enter in the network and to ask for these grants/fellowships.

**STAYS AT OTHER CENTRES**

Whenever possible, it is advisable for PhD researchers to spend a period at a foreign research centre to complete their training. Details, in terms of location and proper timing, should be organized in coordination and with the approval of the PhD researcher’s supervisor.

There are pre-doctoral grants to partially or totally cover the cost of PhD researchers spending a period of scientific study at foreign centres, usually 3 to 9 months. Such stays abroad are required for the “International Doctorate” mention. The funding will normally also cover the cost of travel.

There are also specific grants for “stays at other centres” see a summary in the intranet and contact the pre-award manager for further information (contact details in Annex 1).

Stays in other research centres and universities might allow you to go for the mention “International Doctor”. For more information see: UB Doctorate Regulations⁹, and UPF Doctorate Regulations for International Doctor¹⁰.

This means that your PhD diploma will include the “International Doctor” mention if the following circumstances are fulfilled:

**UB Regulations for International Doctor:**

a) The doctoral researcher has spent a minimum of three (3) months in a foreign country in a prestigious high education institution or research centre doing training or/and research activities related to the thesis research project. This period and activities must be previously approved by the PhD program academic committee, and certified by the responsible person for the research group in the receiving foreign institution.

---

⁹ [https://www.ub.edu/portal/web/medicina-ciencias-salut/presentacio-de-la-tesi](https://www.ub.edu/portal/web/medicina-ciencias-salut/presentacio-de-la-tesi)

¹⁰ [https://www.upf.edu/web/phd-biomedicine/mencion](https://www.upf.edu/web/phd-biomedicine/mencion)
b) Part of the doctoral thesis, at least the abstract and conclusions, should be written and presented in a language usually used for scientific communication in the specific field, different from any of the official languages in Spain. These rules do not apply when the periods abroad, the reports and the experts come from a Spanish or Catalan speaking country.

c) The thesis has to be reviewed by at least two (2) doctors with expertise in the field belonging to a non-Spanish high education institution or research centre.

d) At least one doctor with expertise in the field, belonging to a non-Spanish high education institution or research centre, and different from the researcher responsible for the period abroad referred in section a, is member of the jury that evaluates the thesis dissertation.

e) The defence of the thesis has to take place in the university where the researcher is registered for the PhD programme, or in any participant university in the case of joint programmes according to what is agreed in the collaboration agreement.
UPF Regulations for International Doctor:

a) That during the training period required to obtain the qualification of doctor, you have undertaken a minimum stage of three months outside Spain at a renowned higher education institution or research centre, studying or doing research work. The stage and activities must be approved by the supervisor and authorized by the academic committee, and they must be included in the researcher’s Activities Document.

b) That part of the thesis (at least the summary and conclusions) has been written and is presented in one of the usual languages for scientific communication in your field of knowledge, other than any of the official languages in Spain. This regulation is not applicable when the stages, reports and experts come from a Spanish-speaking country.

c) That at least two expert doctors belonging to a non-Spanish higher education institution or research institute https://www.upf.edu/intranet/secretaria-doctorat/en/InfoiTramits/noudoctorat/mencio.html and https://www.upf.edu/documents/4074697/8955400/international_mention_external_report.docx/95ebca34-4b48-bb42-f12e-ae4ed2754732

d) That at least one expert with a doctorate belonging to a non-Spanish higher education institution or research centre, other than the person responsible for the stage referred to in paragraph a), has been a member of the thesis assessment board.

e) The thesis defence must be undertaken at UPF.

NOTE: the internship may be carried out either in a single period or distributed in different periods; however, the receiving institution must be always the same.

Another possibility is to develop your doctorate in “co-tutela”. For more information see: Títol VIII UB Doctorate Regulations11 and Normativa sobre cotutela de tesis doctors UPF12

11 Cotutela | UB Escola Doctorat
12 https://www.upf.edu/web/seu-electronica/normativa-sobre-cotutela-de-tesis-doctors
TRAINING PROGRAM AND PARTICIPATION IN CONGRESSES

In addition to the compulsory training requirements on crosscutting issues to be achieved by all PhD researchers at ISGlobal (see page 9 and Annex 3), all PhD researchers should plan their training and their participation in conferences with their supervisor on a yearly basis. ISGlobal PhD researchers have several training opportunities available:

- **Continuous training program offered by ISGlobal**: The institution has an annual program of continuous training for all ISGlobal people. That program includes courses on the required knowledge asked to all ISGlobal PhD researchers and also specific courses addressed to PhD needs. The Continuous training program is published in the Intranet. Within the continuous training program, ISGlobal seeks to take full advantage of the wealth of knowledge held by its staff in many different fields and runs internal training courses. The courses feature diverse subjects of interest to ISGlobal employees. We encourage people to participate by both giving lessons and signing up for the courses. If you have any subjects you would be interested in lecturing on, please contact Human Resources (M José Merino, mariajose.merino@isglobal.org).

- **The PRBB Intervals Program** is an interdisciplinary educational program for professionals working at the Barcelona Biomedical Research Park (PRBB), including all ISGlobal researchers. Some of the courses cover topics related to PhD training, such as, scientific writing, preparing a PhD thesis and presentation skills. All UPF PhD researchers should attend the course Science in Action. The Intervals program is published in the Intranet. For further details, please visit [http://intervals.prbb.org/](http://intervals.prbb.org/)

- **Participation in ISGlobal Academic Courses**: ISGlobal offers short courses on topics related to global health for postgraduate students, researchers and health professionals ([https://www.isglobal.org/ca/training-programmes](https://www.isglobal.org/ca/training-programmes)). ISGlobal PhD researchers can participate in these courses. For more information on courses offered, content, participation registration and cost, please contact: [PhD@isglobal.org](mailto:PhD@isglobal.org). See also Annex 3.
CODE OF GOOD SCIENTIFIC PRACTICES and RESEARCH INTEGRITY

ISGlobal standards for research integrity are set in the (PRBB) together with the Addendum approved by the Core Scientific Committee on 21st July 2016 and updated in September 2020. The Code represents a set of recommendations and commitments governing scientific activities. The aim is to create an environment conducive to quality research and prevent problems arising in relation to the integrity of scientists in their work. The recommendations set forth complement current legal regulations.

Within ISGlobal, the ISGlobal Good Scientific Practice Committee (ISGlobal-GSPC) is the delegated Core Scientific Committee (CSC) body in charge of promoting research integrity and handling potential cases of research misconduct. ISGlobal-GSPC will handle potential cases of suspected scientific misconduct according to the SOP Management of Suspected Scientific Misconduct.

The ISGlobal-GSPC can be contacted at research.integrity@isglobal.org

For more information visit the “Research Integrity and Ethics” section of the intranet.

ETHICS AND PERSONAL DATA PROTECTION

ETHICS

ISGlobal is bound by two Ethics Committees, the CEIm-Parc de Salut Mar and the CEIm Hospital Clinic, which are Campus specific (see the Addendum of the Good Scientific Practice Code):

- CEIm PS Mar for studies lead by PI's based at Campus Mar
- CEIm Hospital Clinic for studies lead by PI's based at Campus Clínic

The procedures, instructions, and templates for submitting a proposal to the ethics committee (Clinic or Mar) are detailed at the https://isg-intranet.isglobal.org/formularis/447/download

Please, check always at the intranet for the current version of the document.

NOTE - Ethics in Horizon Europe

Ethics aspects in Horizon Europe are highly relevant. The following sections should be completed:

- The ethics table at the online Administrative Form
- The TWO sections addressing the ethics self-assessment at the online Administrative Form.
- An optional Ethics annex could be attached (pdf, max 10Mb). This annex should include any extra information / details on the ethics assessment, that due to the limited number of characters cannot be provided on the Administrative Form, and/or any relevant support material.

For preparing the ethics annex, the Template_HE_EthicsSelfAssessment available at the intranet can be used. Please, check always at the intranet for the current version of the document.

For questions regarding Ethics issues or CEIm’s functioning contact Joana Porcel or M José Cavallin (joana.porcel@isglobal.org, mariajose.cavallin@isglobal.org).
PERSONAL DATA PROTECTION

Personal data protection is a highly relevant component for the ISGlobal’s activity. It is, not only, an issue of compliance and institutional reputation, but also our responsibility to guarantee the participants’ privacy. **We are responsible of managing the people’s most sensitive information.**

The institution has a policy in place that provides guidelines regarding personal data protection from collection and management (including sharing and transfer) to storage. The policy aims to ensure that personal data at ISGlobal is handled and maintained in accordance with the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, the Spanish Organic Law 3/2018, of December 5, of personal data protection and guarantee of digital rights, and the Biomedical Research Law (Ley 14/2007).

The policy is available at the intranet, please review it carefully and contact the Data Protection Officer (DPO, lopd@isglobal.org) if you have any question or need specific training / advice on how to manage personal data in your project.

ISGlobal BIBLIOGRAPHIC SIGNATURE

It is critical to guarantee the identification and recovery of the scientific publications both at a centre level and researcher level. Please check the “Publication policy” available on the Intranet for the bibliographic signature to use.

OTHER

ISGlobal PhD researchers are part of the ISGlobal Alumni network. Being part of this network allows you to connect with other alumni, be informed of ISGlobal Alumni activities, and check job offers and training opportunities. Join now the Alumni LinkedIn group and check the website.

At ISGlobal, our main way of communicating is via our intranet: please refer to it on a daily basis to ensure you are up with the latest ISGlobal news, seminars, courses, and other events. Remember to check out the ISGlobal Welcome Manual, likewise available at the intranet. It offers specific information on organizational issues and regulations.

Mental Health Support

If you require psychological support during your doctoral studies, you can contact:

- Salud Laboral, if you have a contract with ISGlobal. This assistance is free of charge. 932275538/5431
- If you don’t have a contract with ISGlobal, the Faculty of Psychology of the University of Barcelona: “Unitat de Teràpia de Conducta” offers paid assistance. 933125020/ utc.clinica@ub.edu
- If you are registered at the UPF, you can contact the Psychological Support Service that offers free assistance.
ANNEXES

ANNEX 1. - List of Contacts

PhD Committee:

- **Chair**: Núria Casamitjana ([nuria.casamitjana@isglobal.org](mailto:nuria.casamitjana@isglobal.org))
- **Secretary of the PhD Committee**: Yolanda Amat ([PhD@isglobal.org](mailto:PhD@isglobal.org))
- **Campus Mar Program Coordinator**: Martine Vrijheid ([martine.vrijheid@isglobal.org](mailto:martine.vrijheid@isglobal.org))
- **Campus Clinic Program Coordinator**: Denise Naniche ([denise.naniche@isglobal.org](mailto:denise.naniche@isglobal.org))
- **Scientific Coordinator**: Eva Casamitjana ([eva.casamitjana@isglobal.org](mailto:eva.casamitjana@isglobal.org))
- **PhD researcher representative Campus Mar**:  
  - Natàlia Carreras ([natalia.carreras@isglobal.org](mailto:natalia.carreras@isglobal.org)) and  
  - Evelise Pereira ([evelise.pereira@isglobal.org](mailto:evelise.pereira@isglobal.org))
- **PhD researcher representative Campus Clinic**:  
  - Natalia Roson ([natalia.roson@isglobal.org](mailto:natalia.roson@isglobal.org)) and  
  - Camila Picchio ([camila.picchio@isglobal.org](mailto:camila.picchio@isglobal.org))

Human Resources:

If you have any queries or need any help with regard to human resources issues, including internal training.

- Maria José Merino ([mariajose.merino@isglobal.org](mailto:mariajose.merino@isglobal.org)) and
- Samuel Espinal ([samuel.espinal@isglobal.org](mailto:samuel.espinal@isglobal.org))

Pre-Award Management:

Information of grant opportunities are disseminated through the [funding.opportunities@isglobal.org](mailto:funding.opportunities@isglobal.org) mailing list.

If you plan to apply for a grant, the Preaward team must be informed well in advance. Preaward provides support and technical advice on how to prepare a proposal, i.e. institutional description, management of institutional signatures and formal submission when required by the funder. For further information please contact Tommaso Legnaioli, Head of Preaward Dept, [tommaso.legnaioli@isglobal.org](mailto:tommaso.legnaioli@isglobal.org)

Office for Coordination and Research Management:

If you have any questions related to scientific policies and/or procedures, please contact Joana Porcel ([joana.porcel@isglobal.org](mailto:joana.porcel@isglobal.org)) or Eva Casamitjana ([eva.casamitjana@isglobal.org](mailto:eva.casamitjana@isglobal.org)),

Last Revision - December 2021
ISGlobal Communication Department:

If you have any issues related to external communication. Please be sure to inform Beatriz Fiestas (beatriz.fiestas@isglobal.org or contact her by phone at 1816) of any image related issues (for instance, any communication with the media, use of logos, etc.) since the centre has its own approved Communication Plan that should be followed at all times.

ISGlobal Education & Training Department:

Please contact our Education & Training Department for any issues related to education and teaching (nuria.casamitjana@isglobal.org or PhD@isglobal.org)
### ANNEX 2. PhD Annual Plan

#### Past academic year: 2020-21

<table>

**Last Update:** [Image]  
**Do you need to include further comments/information?** [Image]
ANNEX 3. - Minimum training requirements on cross cutting issues

- Statistics/Data Analysis and Management
- Fluency in public speaking and science communication
- Scientific writing in English for publications
- Writing an academic and professional CV
- Epidemiology and Systematic review/meta-analysis training is highly recommended

How to apply for ISGlobal internal training, PRBB Intervals courses and academic programs and short courses:

<table>
<thead>
<tr>
<th>Type</th>
<th>How to access</th>
</tr>
</thead>
<tbody>
<tr>

I declare that I have not received any other kind of economic support related with the thesis presentation

Signature

**IMPORTANT:** Remember to attach the budget and send it to Yolanda Amat (PhD@isglobal.org). The invoice must be issued to ISGlobal’s name with the following information:
Address: Carrer Rosselló, 132
Barcelona, 08036
CIF: G65341695
ANNEX 6. – Template: Content of Signed Agreement between the different parties (Pre-doctoral Researcher + Director(s)/Supervisor(s))

The pre-doctoral researcher and its Director(s)/Supervisor(s) must send this document once completed and signed to the ISGlobal HHRR and Education & Training Departments, at the time of the PhD contract signature:

XXX, as PhD director of YYY, commit on the following responsibilities:

- Agree on the doctoral thesis research proposal and working plan; including milestones and deliverables, and training and mobility plan (to be included as annexes to this document once available)
- Define the objectives and take responsibility for the pre-doctoral education of YYY, advise and guide him/her in order that the expectations of the initially proposed training may be fulfilled within the time allotted.
- Provide YYY with the best possible conditions for the development of his or her future scientific career.
- Interact personally with YYY on a regular basis in order to supervise the tasks with which he/she is entrusted and ensure that those tasks are completed.
- Encourage regular meetings to discuss the progress of the assigned tasks and contribute to the scientific and technical development of YYY.
- Monitor the working conditions of YYY and ensure that he/she receives appropriate health and safety training.
- Provide YYY with up-to-date information regarding legal requirements affecting scientific activities.
- Jointly develop and validate the annual follow-up with YYY.
- Pay 50% annual registration fee, if not covered by grants.
- Ensure the salary of YYY for at least 3 years and extend if needed until the PhD thesis defence.
- Assess and facilitate training needs of YYY.
- Support attendance to conferences, aiming to have YYY present in at least one international conference.
- Eventually support YYY in doing a stay abroad in the context of her/his PhD development to be able to apply for the "doctoral international mention".

YYY, as pre-doctoral researcher, commits to:

- Know the general doctoral regulations that apply in their university and the specific ones that apply to their PhD programme.
- Develop the thesis research work as agreed and approved in the doctoral thesis research proposal and working plan (to be included as annexes to this document once available).
- Comply with ISGlobal Code of Good Scientific Practices.
- Comply with all ISGlobal ethical and data protection requirements.
- Comply with ISGlobal Publication Policy.
- Fulfil the agreed training plan.
- Fulfil the agreed mobility plan.
- Jointly complete and validate the annual follow up template.
- Meet with a member of the ISGlobal PhD committee for the annual follow up.
- Participate in ISGlobal seminars.
- Participate in the ISGlobal Annual PhD symposium.
- Fulfil and complete all administrative processes required by the doctoral programme the pre-doctoral researcher is registered in at the university.
- Inform the ISGlobal Education & Training and Human Resources Departments the date of the submission and defence of their thesis at least one week in advance to the date of the presentation.
