- Interacting with teachers who are experts with extensive field and/or research experience all over the world, including low- and middle-income settings
- Obtaining a degree from world-class academic and research institutions: the University of Barcelona (UB) and ISGlobal
- Engaging with UB-ISGlobal's interdisciplinary staff, comprising over 500 professionals worldwide
- Networking through our dynamic alumni community

Practical information

LENGTH:	September-July
SCHEDULE:	Full time
MODE:	Face-to-face
LANGUAGE:	English
LOCATION:	Faculty of Medicine and Health Sciences, University of Barcelona
TYPE:	UB-specific Master's degree

Make equity in health a reality

The Master of Global Health is a multidisciplinary programme that will allow you to acquire the knowledge and develop the skills and capacities you need to tackle the current global health challenges.

By the end of the programme you will be able to:

- Analyse the factors that affect the health of the global population, with emphasis on the most vulnerable groups
- Evaluate the complex relationship between health and other areas, such as economics, politics, anthropology, social, and environmental sciences
- Design effective and sustainable solutions to address health equity in a globalised world

“Global health isn’t only for doctors, nurses or people working in the health sector. Its multisectorial component creates a demand for various expertise, where everybody can get involved. As a global health advocate, you need to be open enough to listen to different people and perspectives in order to establish better health and planetary solutions”

Maureen Chileshe, medical doctor, Zambia, MGH2022

“This Master really gave me the tools that I needed to have a better understanding of the Global Health world, to gain the skills that I needed, and also to meet the people that would empower me to carry on in my journey”

Amina Bouothmani, pharmacist, Tunisia, MGH2022

This is a collaborative and interdisciplinary programme, which combines lectures with active and participatory sessions.

Students learn by doing and by solving problems.

Programme 60 ECTS
