

# ISGlobal Alliance Strategic Basis 2015/2016

## Vision

To be a world class research and translation centre in Global Health working towards a world in which all people can enjoy health.

## Mission

To improve Global Health and promote Health Equity, through excellence in research, translation and application of knowledge.

## Values

- Excellence
- Respect for diversity
- Fairness, Accountability and Transparency
- Independence
- Commitment to Public Health
- Highest ethical standards
- Creativity in a friendly work environment

## Core Areas

### Overall Goals

#### Research

Expand the frontiers of science in Global Health and tackle the main Global Health challenges

#### Policy and Global Development

Translate the ISGlobal Alliance's evidence-based science into policy by influencing relevant stakeholders, in order to have impact which will improve Global Health and promote Health Equity

#### Education & Training

Increase Global Health Equity by educating and training researchers and professionals from around the world

### Outcomes

Research portfolio is updated and includes interactions between non-communicable diseases, infectious diseases and their determinants of health at the global level

Improved health policies informed by evidence-based science related to Global Health and Equity

Trained researchers and professionals contributing to reduce health inequities

### Aims

- 1 Strengthen research in the Alliance's existing areas of excellence, increasing the novelty and relevance of the knowledge, technology and methods
- 2 Identify and build on synergies between CRESIB and CREAL
- 3 Explore and develop new research areas
- 4 Strengthen partnerships with CRESIB's international platforms and other research centres
- 5 Strengthen the role and resources for horizontal scientific services as a strategy to create greater synergies
- 6 Promote scientific excellence, leadership and internationalization
- 7 Promote knowledge transfer and innovation
- 8 Integrate CRESIB and CREAL's research portfolio by organizing an optimal integrated scientific structure for the Alliance

- 9 Provide scientific evidence stakeholders to impact Global Health policy
- 10 Strengthen the ISGlobal's "Initiative" model as the main strategy to achieve impact of the Alliance's research programmes
- 11 Create an innovative model for action to become a relevant provider of technical assistance in the ISGlobal Alliance's areas of expertise

- 12 Position ISGlobal as an international reference in Global Health education

## Transversal Areas

### Overall Goals

### Outcomes

### Aims

#### Communication

Make science accessible to all audiences to raise awareness on key Global Health themes

Increased visibility and awareness of the Alliance's areas of expertise among targeted stakeholders

- 13 Develop an outreach plan, including the current Alliance's most relevant research areas, into its communication agenda
- 14 Promote the visibility the ISGlobal Alliance

#### Support activities

Provide the highest organizational quality to our teams in order to develop their work more efficiently and in the best conditions

Optimal joint support services providing the best organizational quality to work more efficiently

- 15 Place talent as a central axis of the alliance
- 16 Efficiently manage resources
- 17 Optimize fund sourcing and project management
- 18 Implement a state of the art information and communication technology infrastructures and system

#### Governance

Ensure an efficient integration according to defined processes and timeline

A fully functioning integrated ISGlobal

- 19 Develop a governance model according to the public-private partnership context to support the international leadership in Global Health research and translation of knowledge
