

**The Science Shop identifies
priority fields and
Civil Society Organisations (CSO)**

Priority fields according to the social,
cultural and political contexts

1

**The Science Shop identifies
priority fields and
Civil Society Organisations (CSO)**

**Science shop launches call for participation
to collect social demands from CSOs**

Internet post, social-media, via mailing list

SS participates or organises events
with associations

2

**Science shop launches call for participation
to collect social demands from CSOs**

**CSOs submit the social demand
and projects to SS**

The SS helps CSOs in formulating the research question and developing the project

The SS submits a synthesis of the projects to the scientific committee

3

CSOs submit the social demand and projects to SS

SS organises a scientific committee with researchers to choose innovative projects

Reformulation of research questions if necessary

Identification of research fields related to the CSOs' questions

4

SS organises a scientific committee with researchers to choose innovative projects

**Recruitment of the intern in collaboration
with CSO & senior researchers
to supervise the project**

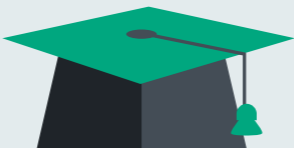

SS writes and publishes internship offers targeting post-graduates

Communication of internship offers through student networks and university administration.

5

Recruitment of the intern in collaboration with CSO & senior researchers to supervise the project

Start of SS project within the CSO

SS can organise a launching event of projects with CSOs, researchers, pedagogical referents as well as policy makers

6

Start of SS project within the CSO

Students further develop the project in partnership with the CSO, pedagogical referents and SS

Development of research protocols & theoretical approach related to the project

Creation of research tools to gather field data

SS regularly monitors the project by contacting the supervisors and students

7

Students further develop the project in partnership with the CSO, pedagogical referents and SS

SS designs and animates training sessions for students and CSOs

Training sessions around :

- Participatory research
- Communication of research results
- Development of skills and competencies

8

SS designs and animates training sessions for students and CSOs

**SS organises workshops with
CSOs and researchers**

Sharing of best practices and field work for co-creation of knowledge and skills

Sensitisation on participatory research

9

SS organises workshops with CSOs and researchers

Dissemination of research findings

Students present the research findings to the CSO, SS and targeted audience through organised events such as science café, workshops, expositions, poster, video...

Students submit and defend their internship report based on the SS project

10

Dissemination of research findings

**Presentation of the project
results to general public**

Publication of scientific articles
on open sources

SS communicates results and good
practices through a network in the
field of participatory research

11

**Presentation of the project
results to general public**

Impact evaluation

Societal impact for CSOs

Student employability

Advancement of research practice

12

Impact evaluation
