The digital revolution has the potential to improve health and empower patients, but it could also increase health inequities, shaping the economy and the society.

ENERGHY 14-day Summer School is a toolbox and a fresh experience to change perspectives for a new generation of Global Health innovators. Designed to empower postgraduate students, researchers and young professionals to create new business models with global citizen-centric solutions aimed at democratizing health for all.

What will you learn?

You will develop an entrepreneurial mindset; acquiring innovation, management and communication knowledge and skills to create a start-up.

Global Health
challenge-based

Joint Acceleration
program

Accredited European
postgraduate course
(5 ECTS)

Motivated by the Sustainable Development Goals

"Learn-by-doing" with open discussions with entrepreneurs, tech transfer experts, real challenge-based workshops, spotlight speakers, online toolbox and final pitch award

Leverages talent putting together top hospitals, research, academia, tech transfer, civil society organisation and industry partners from across Europe to jointly work on a unique course offer on global health transformation

Worldwide reach, with participants from around the globe and different backgrounds to enrich perspective and networking

Participants profile

- Masters and PhD graduates or students;
- Post-Doctoral researchers;
- Young entrepreneurs and professionals motivated to lead change in Global Health coming from different disciplines. Fluency in English is required.
